

The Dew Difference

Dew objective is to provide the optimum products and services to our channel partners to improve profitability and promote growth. We understand that starting a new business, changing careers, or changing suppliers can be difficult. We are specifically organized to ease these transitions, providing critical benefits and resources to our partners:

- Business Protection
- Confidentiality to protect your business
- Application and Sales Support
- Industry experts to work with you
- Make product recommendations
- Troubleshooting and Technical Support
- Participate in critical meetings
- Technical and sales training
- Product application guides
- MSDS's, product data sheets, technical bulletins
- Laboratory for R&D, quality control, competitive product evaluation
- Custom Formulating
- Delivery & Inventory

Equipment Solutions

A major cause of water treatment program failure is using the incorrect or improperly operating equipment. Dew places a special emphasis on equipment's. We maintain a well staffed equipment division with the product line, expertise, and commitment necessary to provide cost effective solutions.

Expert Services

Dew is committed to providing high quality service and is proud to offer one of the most comprehensive service packages including books, software's, training and technical support.

Precision Manufacturing

All products are manufactured in our state-of-the-art manufacturing facility located in Greater Noida. Our commitment to quality is reflected in our ISO 9001:2008, 14001 & OSHAS Certification. Dew performs quality control testing on every batch prior to supply. All batch retains are checked multiple times throughout to ensure continued product stability.

Chemical Product Range OEM's

(Chemical Division)

Company Brief

In 1995, Dew was established with the core business focus to provide water treatment products and technical support to Original Equipment Manufacturer (OEM's). Today, Dew formulates and manufactures products to water treatment partners in India and overseas. Since moving to our current location in 2007, Dew Greater Noida manufacturing facility has, and will continue to, expand and upgrade to meet the growing needs of our distributor based customers and prospects.

Our current manufacturing facility is over 30,000 square feet with a total manufacturing capacity well in excess of our existing requirements. For technical and sales support, the Dew team has over 100 years of combined experience in the development and field application of water treatment chemicals to the industrial and commercial boiler, cooling, reverse osmosis and wastewater treatment.

Utilizing excellent raw material supplier relationships, efficient manufacturing methods and highly competitive rates, Dew continues to deliver chemical solutions to an expanding team of water treatment partners throughout India and overseas at highly competitive prices.

Your time is valuable, and so is your customer's. So spend it doing what you do best marketing and servicing your customer. Leave the manufacturing to the experts at Dew.

Dew recognizes the key to our success is our business partners. The fundamental principle of our low cost manufacturing strategy is to pursue water treatment markets through selected channel partners. We have designed our business model to increase the profitability of our customers allowing us to attract and retain the highest caliber distributors.

Working closely with you, Dew can help provide the expert support that you need in this technical market. You can depend on Dew for the latest technology and highest quality water and wastewater treatment chemicals at the best value in the market place.

Dew Range and Technologies

Reverse Osmosis Chemicals

Dew manufactures complete range of antiscalants and cleaning chemicals. Our range of technically advanced water treatment chemicals includes membrane cleaners, dispersants, scale inhibitors, sequestrants, detergents and biocides.

Cooling Treatment Solutions

A customised water treatment program from Dew does more than just protect cooling water system from corrosion, fouling, deposits, and microbiological growth. It helps maximize the life, efficiency, reliability, and safety of cooling water system while keeping energy, water, and maintenance costs to a minimum. Dew provides innovative and effective treatment technologies for all types of cooling system designs and applications.

Boiler Treatment Solutions

Water treatment is a critical part of the preventative maintenance program for any boiler system. Even a small reduction in boiler efficiency due to scale deposits, excess blowdown, or condensate loss can cause a huge increase in operating costs. A customized water treatment solution from Dew helps protect boiler system from the harmful effects of corrosion, scale, and carryover.

Pretreatment and Wastewater Treatment Solutions

Dew offers a wide range of proven wastewater treatment technologies for removing pollutants, minimizing sludge handling and disposal costs, improving effluent quality, and promoting water savings and reuse. Our wastewater treatment products and application expertise help all types of industries meet compliance goals, improve operational efficiencies, and conserve valuable natural resources.

Speciality Formulations

Completer range of chemicals for Cleaners, Food, Beverages, Metal Treatment, Oil Field, Construction, Mining, Textile, Pulp and Paper, Sugar Processing, Agriculture, Speciality Polymers and Invert Sugar.
